

### Packaging

- 8"-24" Roll Diameter.
- Standard 3" I.D. cores are used. 6" heavy wall cores are available on request.
- Rolls are individually sleeved and core plugged.
- Special sleeving is available to differentiated products for the medical and food industry, or for products with UVI content.
- Rolls are packaged on skids in pyramid, square formation or on end.
- Each roll is tied securely and pallets are stretch wrapped for dust free packaging.
- We also customize our packaging upon customer request.
- Rolls can be boxed or in cradles for extra protection upon request.
- Rolls, boxes and skids are marked clearly identifying the product and quantity.

## Regency Plastics Company Ltd.

Since 1958 Regency Plastics has grown to be one of North America's premier manufacturers of polyethylene flexible packaging. Old fashion values, attention to detail, and immense pride in our work has resulted in many long term relationships.

As the President of Regency Plastics our commitment is to continue this tradition of excellence, with this in mind, we look forward to being a partner in your success.

David d'Ancona  
President

**Extruders and Converters of Polyethylene Films  
For Over 55 Years**

# FIRST AND FOREMOST IN POLYETHYLENE PACKAGING
